G.S.R

**INSTITUTE OF
FACIAL PLASTIC SURGERY**

Bring the Smile Back

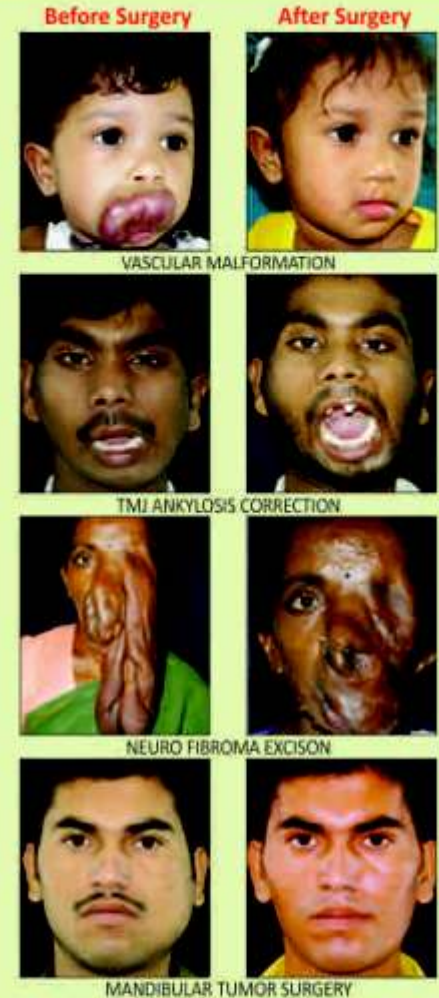

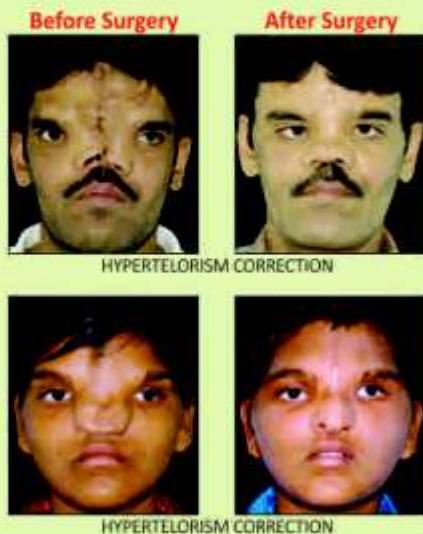

The G.S.R Institute of Facial Plastic Surgery appreciates the opportunity to help patients with defects and diseases of the facial complex. Our team of surgeons and clinicians are committed to providing continuous, comprehensive quality treatment and care.

The Institute provides facial surgical services to 1,500 patients annually. The institute has grown to provide such surgical facilities to 20,000 patients since 1997.

FACE DESIGN is a new concept propagated by a highly qualified team of surgeons. This concept aims to put more importance on beauty and removing the stigma of a facial defect. As FACE DESIGNERS our team will handle the following:

- Craniofacial Trauma (mandible, maxilla and pan facial)
- Orthognathic Surgery (Esthetic Jaw Surgery)
- TMJ Disorders (Ankylosis & Pain Management)
- Rhinoplasty (Aesthetic and Reconstructive)
- Craniofacial Defects (Hypertelorism and Cranio Stenosis)
- Maxillo Facial Tumors (Bengin and Malignant)

Cranio Maxillo Facial Surgeries

Cleft Surgeries
