

Rumi famously said “the wound is the place where the light gets in”. The very awareness of your pain is your opportunity to let the light in. Jane Austen said, “We do not suffer by accident”. Freud believed that “out of your vulnerabilities will come your strength.” As we reflect back to 2021 which was a year of massive covid wave in India, we realise that the only thing that mattered in the end is how far we have come and how much we contributed to our patients

### Annual Report 2021

#### Message from Our Director

As I reflect 2021, I am amazed, amused, sad and happy all at the same times. This was the year of covid second wave in India which like a ruthless nature took many lives. But as is said that being challenged in life is inevitable but being defeated is optional. India overcame its challenges brilliantly and human spirit won over all the odds. The trust of my team and supporters kept me going as I can't let my well-wishers down. When you have nothing to fear, you work the best. We could do 1200 maxillofacial and facial surgeries this year with the support of our relentless hardworking team, and we made our obstacles into our strength. We are very grateful for the immense trust that our patients gave us this year as well. With the hopes, love, gratitude and prayer that 2022 will be good for all of us. Happy new year.....

**Srinivas Gosla Reddy**  
**FRCS Phd**

### Annual Report 2021

**Samiksha-** The wonder Girl Samiksha, the ill-fated girl was brought to us by a medical Volunteer named Katrin (Germany) who works for a local orphanage named Shishu Mandir in Bangalore. The girl was abandoned by her parents and was found in a trash can by police of Bangalore who shifted her to the orphanage. Was it the crises of covid which made the Samiksha found in covid or the parent's condition made them to take this cruel act? Either way the essence of humanity was questioned. She had facial cleft Tessier 0-14. We got the opportunity to operate the Samiksha. She also spent 2 months with us in our school hostel. She became the part of our family. We wonder that how anyone can leave an innocent child to the fate. But when God sends someone to earth, he manages to take care of his children. Samiksha is the proof of human resilience and god's miracle. The girl not only survived but maintained good health despite all odds. We salute the doctors of GSR hospital who did her surgery along with the care takers of Shishu mandir and our hostel team who made her a part of their life. We are also grateful to Katrin who is working tirelessly in a foreign country to serve people unknown to him. This made us restore the faith in humanity and its spirit. The world is running only because of kind people who contribute to the society for the welfare of humanity.

### Annual Report 2021

#### **Story of Anjum:**

The mother of Anjum went into depression after her father left her because of Anjum's cleft lip and palate. The family of Anjum's mother was devastated. The negligence of mother towards Anjum was taking a toll of her health. Seeing the condition of Anjum and her mother, the brother of Anjum's mother adopted her legally and is raising her with utmost care and love. It is said that one person's love is enough to survive the world. For Anjum, it was her uncle who came to rescue.

### Annual Report 2021

#### **GSR Institute of Craniofacial Surgery:**

GSRICFS is extremely thankful to Smile Train for their supports with funds for operating children with cleft lip and palates. This year we operated 1200 patients out of which primary cleft lips were 391, primary palates were 367, secondary cases including alveolar bone grafting, fistula closures, and rhinoplasties were 371. We also operated 45 orthognathic surgeries ( including Anterior maxillary distraction, Le fort 1 osteotomies, Rigid external distraction, Multidirectional distraction, Bilateral sagittal split osteotomies, Genioplasties) , 8 vascular malformations, aesthetic rhinoplasties- 5, facial clefts- 6, neurofibroma- 2. We also performed five intracranial procedures with the support of Sterling Trust (Switzerland).

### Annual Report 2021

#### School Project :

Hyderabad cleft society is grateful to Prof.Hermann F Sailer's and Dr.Erika Sailer's Cleft kinder Hilfe, Schweiz and Stichting Sumbing Bibir Foundation for their support to our cleft school project. This year has been incredible for the kids as they not only explored in academics but also were phenomenal in yoga, chess and outdoor sports and brought more than 50 trophies with their persistent hard work and enthusiasm despite of closure of schools for 6 months due to covid. Our not so little genie Padmawathi is continuing the speech and pathology and is on the road to achieve her dreams.
