

COMPLEX CLEFT AND CRANIOFACIAL RHINOPLASTY

Prof. Dr. Dr. Srinivas Gosla Reddy

MBBS, MDS, FRCS (Edin.), FRCS (Glasg.) FDSRCS (Edin), FDSRCS (Eng.),
FDSRCPS (Glasg.), PhD

Dr. R. Priyadharshini, MDS

Dr. Jothish Manohar, MDS

Dr. Nainika Krishnan, MDS

GSR Institute of Craniofacial Surgery, Hyderabad India

www.craniofacialinstitute.org

GSR Institute of Facial Plastic Surgery

- Non-profit hospital established in 1996
- Dedicated Cleft & Craniofacial Centre of Excellence
- Presently 1,600 cleft and craniofacial surgeries are done every year
- 4 surgeons and 6 fellows with full support team
- More than 40,000 documented cleft & craniofacial surgeries have been performed since 1996
- 600 primary new born cleft children are registered every year

COMPLEX NASAL DEFORMITIES

www.craniofacialinstitute.org

CAUSE OF DEFORMITY

(Surgeon's Assessment)

- Congenital (Cleft or craniofacial defect)
- Anatomic (Hemiplasia, Aplasia, Duplication)
- Esthetic (Hump on the nose)
- Functional (Deviated Nasal Septum)
- Pathologic (Obstruction due to growth in the nose)
- Traumatic (Traumatic injury of the nose)

Congenital Nasal Defect

TYPES OF RHINOPLASTY

QUALITY OF SKIN

<u>THICK SKIN</u>	<u>THIN SKIN</u>
Does not show small irregularities	Small irregularities become visible
Failure to contract-excess soft tissue scar	Early healing- Less oedema
Masks refinement and definition	Ensures that bony/cartilaginous grafts or implants are precisely positioned and smoothly contoured

COMPLICATIONS

www.craniofacialinstitute.org

EARLY COMPLICATIONS

- Haemorrhage
- Hematoma
- Infection
- Edema & Ecchymosis
- Skin Abnormality:
 - Minor Skin Reactions
 - Skin Necrosis
 - Poor Scar
- Septal Perforation

LATE COMPLICATIONS

- Loss of vital tip support
 - Overreduction
 - Underreduction
- Cartilagenous Vault abnormality
- Bony Vault abnormality
